**Natural Language Processing and Sentiment Analysis Lab, Academia Sinica**  
*Research Assistant, supervised by Dr. Lun-Wei Ku*

Taipei, Taiwan  
*Apr 2019 - Present*

- **Visual Storytelling**

- Implemented knowledge graphs to enrich the story content and planned a story plot before generating stories to increase coherence; Integrated Transformer with designed discriminator which aligns human judgement to refine visual stories.
- Proposed a length-controlled Transformer to generate prolonged visual stories with better focus and detail.
- Assisted on developing a website in Amazon Mechanical Turk for human evaluations on story quality.

- **Video Dialogue Question Answering**

- Designed multi-step joint-modality attention network based on recurrent neural network to reason better on dynamic scenes.

- **Multiview Items Recommendation**

- Designed a GNN-based user-oriented module that aggregate features to make personalized recommendations.

**Chaotic Systems and Signal Processing Lab, National Chiao Tung University**  
*Research Assistant, supervised by Prof. Bing-Fei Wu*

Hsinchu, Taiwan  
*Sep 2015 - Nov 2017*

- **Personalized Image-based Heart Rate Detection**

- Developed an Adaptive Neural Network Model Selection algorithm to dynamically select personalized model and eliminate facial luminance variation noise from rPPG signal.
- Drafted a grant proposal, including both research proposal and budget planning, and won NTD 20 million of venture capital from Ministry of Science and Technology.

**Institute of Electrical and Control Engineering, National Chiao Tung University**  
*Teaching Assistant - Digital Signal Processing (IEC5202)*
